About ALMA

If you are not familiar with this organization, ALMA is an organization that benefits managers of laboratories in industry, government, and universities all over the world. ALMA's unique strength lies in providing a forum for laboratory managers to interact with managers who have similar problems and who are willing to share solutions and ideas that have worked in their laboratories. Participation in ALMA helps managers develop better management skills and practices. You can find more information about ALMA by visiting the ALMA website at <http://www.labmanagers.org>. If you would like to find a local network of professionals facing the same challenges as you then the ALMA local chapter meetings are an excellent opportunity to network, share and learn first-hand about best practices.

Don't miss this opportunity to share insights with your peers.

NEXT National ALMA meeting- Oct 21-24, Minneapolis, MN
