About ALMA. . .

For more than 40 years, the Association of Laboratory Managers (ALMA), a nonprofit organization, has helped managers of laboratories in industry, government, and universities all over the world become better leaders. ALMA's unique strength lies in providing a forum for laboratory managers to interact with peers who have similar issues and share solutions and ideas which have worked in their laboratories. Participation in ALMA helps managers develop better management skills and practices. You can find more information about ALMA by visiting LabManagers.org. If you would like to find a local network of professionals facing the same challenges as you then, the ALMA local chapter meetings are an excellent opportunity to network, share and learn first-hand about best practices.

Don't miss this opportunity to share insights with your peers!
